

Elluminate *Live!* Participant

Quick Reference Guide

Elluminate *Live!*® is a world-class, real-time training, demonstration and collaboration environment that is powerful, flexible, and easy to use. Elluminate's collaboration environment enables the delivery of live, online learning, training, coaching, mentoring, and meeting. Effectiveness is increased by engaging participants with the ability to talk over the Internet (with full, 2-way audio), exchange text messages, display live video, share whiteboards, multimedia files, and applications—all in one intuitive, graphical interface. Whether the environment is hosted by Elluminate or installed on your server, it is easy to set up, easy to use, and customizable.

Unlike the Internet, Elluminate *Live!* is built specifically for live, multi-media collaboration. Our unique Collaborative Communications Framework (CCF) automatically ensures that everything is in the right place at the right time. Whether you have a dial-up modem or a high-speed LAN, you get the same superior quality, high performance, and dependability—with no lag time or garbled communication. So you can focus on content, not technology.
